

FITNESS COACHING APP – FEATURE REQUIREMENTS DOCUMENT (FRD)

Prepared by: Coach Maurice

Document purpose: Feature alignment, feasibility review, and implementation planning

Version: v1.0

Status: Open for comments & recommendations

1. Project Overview

1.1 Background

This app is designed to support **online fitness coaching**, with a primary focus on **fat loss clients**. The goal is to centralize coaching, reduce manual follow-ups, and improve client accountability through structured systems.

1.2 Target Users

- Online fat loss clients
 - Gym and home workout clients
 - Clients enrolled in challenges and transformation programs
-

2. Core Objectives

- Automate day-to-day coaching processes
- Improve client adherence and accountability
- Provide a premium, structured coaching experience
- Reduce reliance on WhatsApp, spreadsheets, and manual tracking

3. Feature Scope

3.1 Phase 1 – Must-Have Features (MVP)

3.1.1 User Accounts & Profiles

- Client registration and login
- Personal details (age, height, weight, goals)
- Before/after photo uploads
- Progress history view

Comment Section:

(Developer to comment on feasibility, tech stack, and data storage approach)

3.1.2 Workout Programs

- Assign gym or home workout plans
- Display exercises with sets, reps, and rest time
- Workout completion tracking
- Progress history per workout

Comment Section:

(Developer to suggest best UX approach)

3.1.3 Nutrition Section

- Meal plans uploaded by coach
- Food swaps / alternatives

- Basic macro or portion guidance (not calorie tracking heavy)

Comment Section:

(Developer to advise best way to structure nutrition content)

3.1.4 Progress Tracking

- Weight tracking (manual input)
- Progress photos (weekly or bi-weekly)
- Optional body measurements

Comment Section:

(Developer to advise on charts/visuals)

3.1.5 Notifications

- Workout reminders
- Check-in reminders
- General announcements

Comment Section:

(Developer to advise on push notification setup)

3.1.6 Admin / Coach Dashboard

- View all clients
- Assign programs
- View progress and submissions
- Edit workouts and nutrition content

Comment Section:

(Developer to advise on admin permissions and scalability)

3.2 Phase 2 – Nice-to-Have Features (Post-MVP)

- In-app messaging or structured check-ins
- Weekly check-in forms (photos, weight, feedback)
- Subscription and payment integration
- Challenges, streaks, or leaderboard system
- Rewards and badges for consistency

Comment Section:

(Developer to advise priority and complexity)

4. Intended User Flow

1. Client signs up / logs in
2. Coach assigns workout and nutrition plan
3. Client completes workouts and tracks progress
4. Client submits weekly check-ins
5. Coach reviews and provides feedback

Comment Section:

(Developer to suggest improvements or simplifications)
